

Focused Topic Networks (FTNs): 2020–2023

Health Systems and Treatment Optimisation	Real World Data, Patient Reported Outcomes, Clinical Trial Endpoints
	Value-Based Healthcare Including Health Technology Assessment (HTA)
	Health Economics Including Efficiency and Sustainability
	Precision Oncology
Quality Cancer Care	Essential Requirements Including Tumour Types and Primary Care
	Evaluation and Metrics (Quality Indicators)
	Communication and Codes of Practice
	Accreditation Programmes for Cancer Centres and Networks
Digital Health	Bringing Digital Innovations to Patient Care
	Artificial Intelligence
	Driving Consensus on Data-Related Issues
Prevention	Primary Prevention
	Secondary Prevention Including Earlier Diagnosis and Screening
	Integrated Diagnostics
	Primary Care Roles
Survivorship and Quality of Life	Tackling Systemic Discrimination Against Cancer Patients and Survivors
	Enhancing Supportive and Palliative Care (psycho-social to drug-related) from Diagnosis to Survivorship
	Beating Stigma and Fear
Inequalities	East-West Divide Including Addressing Survival Differences
	Inclusion: Marginalised and Neglected Patient Groups
	Healthcare Determinants and Health Literacy
	Equity of Access to Innovation, Treatment, Medicines, Clinical Trials
Workforce	Training and Development
	Specialisation: Mobility and Professional Qualification Recognition
	Workforce Conditions, Including Protecting Patient Safety
HPV Action	Vaccination
	Screening
	Treatment
	Research Needs
