

INTERACT EUROPE 100

INTERACT-EUROPE 100: ENROLMENT GUIDE FOR CANCER CENTRES, TRAINERS AND PARTICIPANTS

**Co-funded by
the European Union**

About the Project

The [INTERACT-EUROPE 100 project](#) brings together 43 partners spread across 17 European countries aiming to implement the [Inter-speciality Cancer Training Programme \(ISCTP\)](#) curriculum developed under the [INTERACT-EUROPE project](#).

The objective of the ISCTP is to foster a patient-centred approach to quality cancer care through the promotion of [multidisciplinary and inter-professional teams](#). In fact, INTERACT-EUROPE 100 aims at positioning Europe as a global leader in inter-speciality cancer care by integrating a robust understanding within multidisciplinary oncology teams via inter-speciality training programmes. This initiative builds on the success of the initial INTERACT-EUROPE phase, which developed the training curriculum with input from educational organisations, healthcare professionals, patient representatives, and Cancer Centres. The initiative is unique on a global scale: such comprehensive ISCTP has never been implemented in the oncology field before. The programme will fill the gap in inter-speciality cancer training, while enhancing the skills of oncology professionals. Long-term impacts also include improved cancer care outcomes through enhanced collaboration within paediatric, including AYA, and adult cancer care, as well as driving progress and innovation by advancing automatic translation technology in oncology education.

Inter-speciality Cancer Training Programme

How Are We Going to Implement It?

The main figures around which the project gravitates are the Cancer Centres, the vital locations where the change will take place, the Trainers and the Participants.

The initial goal of the project was to recruit 100 Cancer Centres where oncology specialists, nurses, and other allied healthcare professionals will have the unique opportunity to attend onsite and online trainings created and hosted by high-level specialists in the oncology field. As of May 2026, 107 Cancer Centres are taking part in the INTERACT-EUROPE 100. Each Cancer Centre is invited to nominate a team of Trainers and Participants to take part in the project. The team will participate in a series of online and clinical training activities designed and refined based on feedback gathered over previous editions of the programme. These activities have been developed by leading oncology experts representing a broad range of medical and non-medical oncology specialties and are available in seven EU languages (English, French, German, Spanish, Romanian, Slovenian and Ukrainian) and clinical trainings from the organisation of origin. More information on both training programmes can be found in the upcoming pages.

For both Cancer Centres, Trainers and Participants, selected candidates will have to possess the requirements and eligibility criteria mentioned in the following sections of the guide.

Trainers' Profile

Selected Trainers will:

- Possess a **recognised professional qualification in oncology**, being qualified in **medicine, surgery, nursing or an allied health profession**, working in at least one of the specialties listed below. Other specialties should be discussed with the coordinator upon expression of interest.
- Have practised in the **professional roles listed for not less than 4 years**.
- **Professional fluency in English** to be able to participate in the onsite training.
- Currently **working in a centre that meets the eligibility criteria** (page 6).
- Working in an **EU member state**, or one of the following **EU4Health-affiliated countries**: Iceland, Moldova, Montenegro, Norway, Serbia and Ukraine.
- Alongside a copy of their **CV**, be able to provide a signed **letter of recommendation** from their employing or training institution, indicating:
 1. The institution's support for the candidate's involvement, including the provision of time for the candidate to participate in the programme.
 2. The institution's support for the candidate's involvement in delivering the ISCTP.
 3. The institution's assurance that the candidate meets the above-described criteria.
 4. The contact details of your administrative point of contact.

Trainers' Programme

Trainers' training consists of a total of 90hours, including:

- Online introduction and training (15 hours);
- Onsite and clinical training to be incorporated into the Trainers' actual work and tasks at their employing organisation (30 hours);
- Inter-Specialty Cancer Training Online Programme (45 hours).

The training will be organised in four units: contemporary pedagogical approaches and methods in interprofessional education, patient-centred interprofessional practice in cancer care continuum, ISCTP content and guidelines for delivery, ISCTP delivery in Cancer Centres and will take place between September 2026 and March 2027. When Participants start the full ISCTP, Trainers will mentor them throughout the programme, approximately six months.

Participant's Profile

Selected Participants will be:

- Professionals of the oncology specialties listed below, with at least **2 years' experience in oncology, or oncology** training finished no more than 3 years ago. Specialities other than the ones listed should be discussed with the coordinator upon expression of interest.
- **Currently working in a centre that meets the eligibility criteria** (page 6).
- Working in an **EU member state** or one of the following **EU4Health-affiliated countries**: Iceland, Moldova, Montenegro, Norway, Serbia and Ukraine.
- Fluency in at least one of the following languages: **English, Spanish, French, German, Slovenian, Romanian** and **Ukrainian**.
- Priority will be given to applications of different professions from the same centre/team.
- The selection of Participants will be carried out by the cancer centre where they come from.

Participants' Programme

Participants will be mentored by Trainers during their training, which will take approximately six months, for a total of 90 hours, to be completed. The ISCTP is divided into 5 courses and 33 units, all designed to improve interprofessional practice in cancer care from different perspectives. The courses are:

- Clinical expertise;
- Communication and collaboration;
- Professional practice and scholarship;
- Leadership;
- Health advocacy and survivorship.

The content of the programme is designed in interprofessional teams, and it aims to increase the knowledge and understanding of the different professions and specialities enhancing the collaboration within and between different specialities and professions. The training will be delivered as follows:

- Online learning activities, translated in seven EU languages (English, French, German, Romanian, Slovenian, Spanish, Ukrainian). (approx. 50 hours);
- Onsite and clinical training, to be incorporated into the Participants' actual work and tasks at their employing organisation (approx. 40 hours).

Certifications

Trainers and Participants will be both certified, at the end of their trainings, with one Micro-credential, Continuing Medical Education (CMEs) and Continuing Professional Development (CPDs) credits, when applicable.

Get Your INTERACT-EUROPE 100 Badge

Centres completing the training will be recognised with badges for their commitment to interdisciplinary, patient-centred cancer care, according to the certification criteria [here](#).

Eligibility Criteria for Cancer Centres and Other Organisations

- **Nature of the Organisation:** applications are welcomed from Cancer Centres, Hospitals of general medical focus, University Hospitals, and Organisation responsible for Accreditation and Training of Cancer Specialists.
- **Geographic Location:** Cancer Centres located within the European Union or one of the [EU4Health](#) associated countries: Iceland, Moldova, Montenegro, Norway, Serbia and Ukraine will be prioritised. As one of the pillar values of the project, inclusiveness will be reached through a balanced recruitment in terms of geographical representation.
- **Expertise:** Eligible organisations must demonstrate expertise in oncology.
- **Capacity and Resources:** Selected organisations must possess the necessary infrastructure, resources, and personnel to support their involvement in the training programme effectively, including adequate facilities, qualified staff, and administrative support to facilitate the training and mentoring of Participants by Trainers.
- **Commitment to the Project's Outcomes:** the applying centre must demonstrate commitment to developing multidisciplinary cancer care within the Organisation by providing a recommendation letter for Trainers and Participants' to be included in the programme.
- **Commitment to Diversity and Inclusion:** Eligible organisations shall demonstrate a commitment to promoting equity, diversity and inclusion within their institutions, ensuring equitable access to training opportunities for individuals from diverse backgrounds and fostering a supportive and inclusive learning environment.
- **Flexibility:** Time flexibility shall be stated to allow Participants to follow the course during working hours.

Eligibility compliance will be provided within the supporting letters requested in the Trainers and participant's applications. Following admission of Participants to the ISCTP, the centre is expected to be readily contactable by the programme coordinators if needed.

Eligible Oncology Specialities of Trainers and Participants

Clinical Nutrition	Clinical Oncology	Coloproctology
Community Nursing	Dermatology	Family Medicine
Gastroenterology	Geriatric Oncology	Gynaecological Oncology
Haematology	Interventional Radiology	Medical Oncology
Medical Physics	Neuro-Oncology	Nuclear Medicine
Nutrition	Oncology Nursing	Oncology Pharmacy
Paediatric Oncology	Pain Medicine	Palliative Care
Pathology	Psycho-Oncology	Radiation Oncology
Radiology	Sexual Medicine	Supportive Care
Surgical Oncology	Thoracic oncology	Urology
Other allied health professionals working in oncology		

Interested Trainers or Participants that are not part of the mentioned specialties, should get in touch with us at interact-europe100@europeanccancer.org, to assess the feasibility of their enrolment.

Application and Selection Process

- 1** Send your expression of interest to INTERACT-EUROPE100@europeancancer.org.
- 2** Your contact details will be added to our database and your application processed.
- 3** Selection process.
- 4** Selection process.
- 5** Onboarding and beginning of the Training.

About INTERACT-EUROPE 100

INTERACT-EUROPE 100 is an ambitious project to provide cancer care professionals with the training necessary to enhance this collaboration – now coming to more than 100 Cancer Centres across Europe.

Building upon the work of INTERACT-EUROPE, its predecessor, INTERACT-EUROPE 100 is a 36-month project (December 2023 – December 2026). It is co-funded by the European Union under the EU4Health programme 2021-2027 as part of Europe’s Beating Cancer Plan. It involves 43 partner organisations from 17 European countries implementing this novel training curriculum.
