## Public consultation on "air quality - revision of EU rules"

Fields marked with \* are mandatory.

#### Introduction

#### Background

Clean air is essential for our health and that of the environment. To this end, the EU – via the <u>Ambient Air</u> <u>Quality Directives</u> - sets air quality standards to avoid the build-up of excessive air pollutant concentrations (see an overview of the <u>EU air quality standards</u> below).

These Directives also define common methods to monitor, assess and inform on ambient air quality in the European Union. Furthermore, they require action, when standards are exceeded, in order to avoid, prevent or reduce harmful effects on human health and the environment as a whole.

As part of the <u>European Green Deal</u> and its <u>Zero Pollution Action Plan</u>, the EU is revising these EU air quality standards, to align them more closely with the recommendations of the World Health Organization. Note that the World Health Organization publishes and updates <u>Air Quality Guidelines</u>, most recently in 2021: these updated Air Quality Guidelines are considered in the ongoing revision of EU rules.

This revision also aims to improve overall EU legislation for clean air, including provisions on penalties in case of exceedances or requirements for public information, as well as propose means to strengthen air quality monitoring, modelling and plans to help local authorities achieve cleaner air.

Pollutant	Concentration	Averaging period	Permitted exceedances each year
Fine particulate matter (PM2.5)	25 µg/m3	1 year	n/a
Particulate matter (PM10)	50 µg/m3	24 hours	35
	40 µg/m3	1 year	n/a
Sulphur dioxide (SO2)	350 µg/m3	1 hour	24
	125 µg/m3	24 hours	3
Nitrogen dioxide (NO2)	200 µg/m3	1 hour	18
	40 µg/m3	1 year	n/a
Lead (Pb)	0.5 µg/m3	1 year	n/a
Carbon monoxide (CO)	10 mg/m3	Max. daily 8 hour mean	n/a
Benzene (C6 H6)	5 µg/m3	1 year	n/a
Ground-level ozone (O3)	120 µg/m3	Max. daily 8 hour mean	25 averaged over 3 years
Arsenic (As)	6 ng/m3	1 year	n/a
Cadmium (Cd)	5 ng/m3	1 year	n/a
Nickel (Ni)	20 ng/m3	1 year	n/a
Polycyclic Aromatic Hydrocarbons (expressed as Benzo(a)pyrene)	1 ng/m3	1 year	n/a

Table 1: EU air quality standards (Pollutant; Concentration; Averaging period; Permitted exceedances each year)

#### Why are we consulting you?

The Commission has launched an impact assessment to support the Ambient Air Quality Directives revision.

In line with the Commission's <u>Better Regulation</u> agenda, this public consultation questionnaire will inform the revision process, and the views collected will be considered in the impact assessment, especially when designing potential (regulatory and non-regulatory) measures to reduce air pollution, strengthen air quality monitoring, modelling and plans, and reduce the related impacts on environment and society.

All citizens and organisations are welcome to contribute to this consultation. Contributions are particularly sought from national / regional / local authorities in the Member States, enforcement bodies, business and trade organisations' representatives and civil society organisations, academia, medical professionals, patient organisations, relevant international organisations, and the general public.

#### Guidance on the questionnaire

This survey is divided into the following parts:

- Part 1: About you questions about yourself and why you are answering this questionnaire.
- Part 2: General questions section on your views on air quality issues. This section does not require technical or expert knowledge of the Directives, and anyone can answer.
- Part 3: Specialised questions section on your views on air quality measures and their impacts. This section focuses on more technical aspects of the topics/measures considered by the Directives' revision and may therefore require expert knowledge to answer. This section can be skipped, if preferred.
- Part 4: Concluding questions & remarks share your thoughts on topics not covered by the questions and provide further information. This section invites you provide any additional comments or elaborate on relevant issues that have not been addressed by the questions.

We estimate that replying to all questions would take about 15 to 30 minutes. Please note that not all questions in the questionnaire need to be answered. In addition, all 'mandatory' questions include an "I do not know/not relevant" or "No opinion" option that you can use when you do not know the answer or do not have an opinion.

You are invited to respond to the best of your abilities or knowledge of the topic. Please use open fields only if there is information to be added that is strictly relevant to the related question.

The results of the questionnaire and a stand-alone summary of the results of the consultation will be produced (to be published <u>here</u>). The analysis of the responses will be included in the impact assessment supporting the revision of the Ambient Air Quality Directives. Please take note of the specific privacy statement for this consultation which explains how personal data and contributions will be dealt with.

In the interest of transparency, if you are replying on behalf of an organisation, please register with the <u>regis</u> <u>ter of interest representatives</u> if you have not already done so. Registering commits you to complying with a Code of Conduct. If you do not wish to register, your organisation's contribution will be treated and published together with those received from individuals.

Your voice matters and we are grateful to you for taking the time to complete this consultation.

#### About you

\* Language of my contribution

- Bulgarian
- Croatian
- Czech
- Danish
- Dutch
- English
- Estonian
- Finnish
- French
- German
- Greek
- Hungarian
- Irish
- Italian
- Latvian
- Lithuanian
- Maltese
- Polish
- Portuguese
- Romanian

- I do not know, or I do not want to answer

The Commission will publish all contributions to this public consultation. You can choose whether you would prefer to have your details published or to remain anonymous when your contribution is published. Fo r the purpose of transparency, the type of respondent (for example, 'business association, 'consumer association', 'EU citizen') country of origin, organisation name and size, and its transparency register number, are always published. Your e-mail address will never be published. Opt in to select the privacy option that best suits you. Privacy options default based on the type of respondent selected

#### Contribution publication privacy settings

The Commission will publish the responses to this public consultation. You can choose whether you would like your details to be made public or to remain anonymous.

#### Anonymous

Only organisation details are published: The type of respondent that you responded to this consultation as, the name of the organisation on whose behalf you reply as well as its transparency number, its size, its country of origin and your contribution will be published as received. Your name will not be published. Please do not include any personal data in the contribution itself if you want to remain anonymous.

#### Public

Organisation details and respondent details are published: The type of respondent that you responded to this consultation as, the name of the organisation on whose behalf you reply as well as its transparency number, its size, its country of origin and your contribution will be published. Your name will also be published.

I agree with the personal data protection provisions

#### Part 2: General questions section

#### 1. How important is having good air quality to you?

- Very important
- Important
- Of minor importance
- Not important at all
- No opinion

## 2. How concerned are you about the levels of air pollution to which you are usually exposed?

- Very concerned
- Concerned
- Slightly concerned
- Not concerned at all
- No opinion

## 3. Are you concerned about the following impacts that air pollution may have in your local area?

	Not at all	To some extent	To a large extent	Fully	No opinion
Impacts on health of the general population	0	O	O	۲	O
Impacts on my health or the health of my family members	0	O	O	۲	©

Impacts on health of vulnerable groups (including children, elderly, people with pre- existing health conditions)	۲	۲	۲	۲	O
Impacts on businesses and small/medium enterprises (including lost work days due to air pollution)	©	©	©	0	©
Impacts on agriculture and crops (including on plant growth and animal health)	©	0	©	0	0
Impacts on natural environment (including pollution of water bodies, or reduced biodiversity)	0	©	©	۲	O
Impacts on buildings and infrastructure (including corrosion or discoloration of buildings)	©	O	©	©	O

#### 4. Which air pollutants are you concerned about?

- Fine particulate matter (PM2,5)
- Particulate matter (PM10)
- Sulphur dioxide (SO2)
- Nitrogen dioxide (NO2)
- Ground-level ozone (O3)
- Carbon monoxide (CO)
- Benzene (C6H6)
- Polycyclic aromatic hydrocarbons (including benzo(a)pyrene)
- Arsenic (As)
- Cadmium (Cd)

Mercury (Hg)

- Nickel (Ni)
- Lead (Pb)
- Ultra-fine particles
- Black carbon and/or elemental carbon
- Ammonia (NH3)
- Methane (CH4)
- Non-methane volatile organic compounds (i.e. organic compounds capable of producing photochemical oxidants by reaction with nitrogen oxides in the presence of sunlight)
- None
- No opinion
- Other

## 5. Would you like to see more action to improve air quality? And if so, to what extent?

- Yes, a significant increase in action and ambition to tackle air pollution
- Yes, a moderate increase in action and ambition to tackle air pollution
- <sup>©</sup> Yes, a **small** increase in action and ambition to tackle air pollution
- No, current action and ambition to tackle air pollution issues is adequate
- No opinion

#### 6. At what level should further action be taken?

Please rank the following from 1 – where most action needs to be taken to 5 – where least action needs to be taken

	1	2	3	4	5
International	۲	۲	0	0	$\odot$
European	۲	0	0	0	0
National	0	۲	0	0	0
Regional	۲	۲	0	0	0
Local / city	0	۲	$\bigcirc$	$\bigcirc$	$\bigcirc$

7. To what extent would you be willing to change your own way of living to contribute to improving air quality in your country / region / city?

Not at all	To some extent	To a large extent	Fully	l do not know	N/A	
------------	-------------------	----------------------	-------	------------------	-----	--

Driving less by car, including in cities	0	0	0	۲	0	0
Driving smaller or fuel-efficient cars	0	0	0	۲	0	0
Using more public transport, walking, cycling	0	0	0	۲	0	0
Changing my habits in residential heating	0	0	0	۲	0	0
Investing in sustainable heating systems	0	0	0	۲	0	0
Improving the energy efficiency of my home	0	0	0	۲	0	0
Making conscious consumption choices to reduce emissions	0	0	0	۲	0	0
Other	0	0	0	0	O	0

### Policy area 1: Closer alignment of the EU air quality standards with scientific knowledge including the latest recommendations of the World Health Organization (WHO).

The Ambient Air Quality Directives set air quality standards for 13 air pollutants. For several air pollutants, these standards are not as stringent as recommended by the World Health Organization via their 'Air Quality Guidelines' (which themselves have recently been updated), in particular for the most harmful fine particulate matter (PM2.5). This revision of EU rules will consider and assess different policy options and scenarios to more closely align EU air quality standards with the latest scientific evidence.

#### 8. Do you think that <u>EU air quality standards</u> should be made more stringent to bring them in line with the updated World Health Organization Air Quality Guidelines and latest scientific evidence?

- Yes EU air quality standards should be made more stringent, fully aligned with the latest WHO recommendations
- Partly EU air quality standards should be made more stringent, but only partially aligned with the latest WHO recommendations
- No current air quality standards are sufficient

No opinion

#### 9. Where (at which locations) should EU air quality standards apply?

- Everywhere, including at locations to which members of the public do not have access, including industrial installations or motorways
- At all locations where there is fixed habitation or there are commercial facilities, as well as at all locations to which members of the public have access (including, for example, roads and sidewalks)
- At all locations where there is fixed habitation or there are commercial facilities
- Only at locations that are representative of the exposure to air pollutants of the general population
- No opinion

#### 10. How quickly should any revised EU air quality standards be achieved?

- As soon as possible
- By 2025 at the latest
- By 2030 at the latest
- By 2040 at the latest
- By 2050 at the latest
- No opinion

#### 11. Do you have any other comments regarding the consideration to amend the EU's air quality standards (this could capture existing achievement of or options to amend the standards, and the feasibility or impacts of such options)?

800 character(s) maximum

The European Cancer Organisation congratulates the European Commission for the initiatives it is taking to improve air quality in Europe.

The European Cancer Organisation fully supports the attention to air quality provided with Europe's Beating Cancer Plan, including the commitment to align the EU's air quality standards more closely with the WHO recommendations, and to encourage improvement of monitoring, modelling and air quality plans.

The European Cancer Organisation has also provided its endorsement to a 2021 Joint Statement by Medical, Public Health, Scientific Societies and Patient Representative Organisations that urges all nations to use the WHO air quality guidelines as the foundational basis for ambitious air quality and emission reduction policies around the world.

### Policy area 2: improving the current air quality legislative framework (including aspects such as penalties and public information).

There have been substantial delays in taking appropriate and effective measures to meet all EU air quality standards throughout Member States. Improvements to the legislative framework, including related to access to justice in case of persistent exceedance, as well as to public information, may facilitate further air quality action. This revision of EU rules will consider and assess different policy options for amended provisions on sanctions and penalties to be established in national systems for non-fulfilment of relevant obligations deriving from the Directives. It will also consider options for a stronger harmonisation of public information.

# 12. Do you believe that the current provisions on penalties in the Ambient Air Quality Directives are sufficient for Member States to comply with EU air quality standards?

- Yes
- Partly
- No
- No opinion

# 13. Do you believe that the Ambient Air Quality Directives should facilitate access to justice, including compensation for health damages due to air pollution (suffered by groups and/or individuals)?

- Yes both stronger facilitation of access to justice in general, as well as of compensation for health damages due to air pollution in particular
- Partly stronger facilitation of access to justice related to air pollution
- Partly compensation for health damages due to air pollution
- No
- No opinion

## 14. How well informed do you feel about air quality in your country / region / city?

- Very well informed
- Well informed
- Somewhat informed
- Little informed
- Not informed at all
- No opinion

#### 15. Which of the following types of information would you want to have

easier access to? (Multiple answers possible)

- (Real-time) air quality data / Up-to-date average concentrations
- Annual reports specifically targeted to the general public
- Air pollution forecasts
- Air quality plans and measures the authorities are taking to improve air quality
- Air quality monitoring networks (e.g. location of monitoring stations, pollutants monitored, etc.)
- Information on whether air quality standards are respected
- Air quality benchmarks that allow comparison with other cities/regions
- Access to downloadable historical data sets
- Information on specific precautions and preventative actions
- General information on short term & long term health risks of air pollution
- Alert/ targeted messaging during high pollution events
- Information on citizens' rights and possible actions if air quality standards are not respected
- Other

# 16. Are there any other elements related to the legislative framework of the Ambient Air Quality Directives (i.e. around defining the types of air quality standards and actions exceedances trigger, governance and enforcement of actions at MS level, and around information provided to the public) that you would consider effective in facilitating the achievement of its objectives?

800 character(s) maximum

The European Cancer Organisation congratulates the European Commission for the initiatives it is taking to improve air quality in Europe.

The European Cancer Organisation fully supports the attention to air quality provided with Europe's Beating Cancer Plan, including the commitment to align the EU's air quality standards more closely with the WHO recommendations, and to encourage improvement of monitoring, modelling and air quality plans.

The European Cancer Organisation has also provided its endorsement to a 2021 Joint Statement by Medical, Public Health, Scientific Societies and Patient Representative Organisations that urges all nations to use the WHO air quality guidelines as the foundational basis for ambitious air quality and emission reduction policies around the world.

#### Policy area 3: strengthening of air quality monitoring, modelling and plans.

The Ambient Air Quality Directives have guided the establishment of a robust system for air quality

assessment and have framed competent authorities' action to achieve cleaner air via air quality plans (i.e. the action taken when and where exceedances occur). However, the criteria on air quality monitoring and modelling could be refined to increase the comparability of air quality data. This revision of EU rules will explore solutions to improve, simplify and increase precision and coherence of requirements with regard to air quality monitoring and modelling, and options to facilitate further the effectiveness of air quality plans.

#### 17. Do you see a need to strengthen further the assessment of air quality?

(Multiple answers possible)

- Yes, we need additional monitoring everywhere, whether high pollution or low pollution levels
- Ves, we need additional monitoring where pollution may be a concern
- Yes, we need additional monitoring of background concentrations (i.e. average pollution levels)
- Yes, we need additional monitoring at locations with pollution peaks due to industrial emissions
- Yes, we need additional monitoring at locations with pollution peaks due to traffic emissions
- Yes, we need to ensure detailed modelling of air quality across the EU
- Yes, we need to ensure detailed modelling of air quality at locations with pollution peaks (e.g. due to traffic or industry)
- Yes, we need to ensure detailed modelling and forecasting of air pollution episodes
- No, we have sufficient data on air quality
- No opinion

## **18.** Do you see a need to improve air quality plans developed by local authorities to address exceedances of EU air quality standards? (Multiple answers possible)

- Yes, air quality plans need to be clearer on the specific sources and origin of air pollution
- <sup>III</sup> Yes, air quality plans need to explain the health consequences of air pollution
- Ves, air quality plans need to assign responsibilities (i.e. who needs to act)
- Yes, air quality plans need to quantify the costs and benefits of action
- Yes, air quality plans need to spell out how each measure contributes to solving pollution problems
- Yes, air quality plans need to estimate by when action would have resolved the pollution problem

Yes, air quality plans need to be followed-up by a regular assessment of their implementation

- No need to change air quality plans
- No need to change air quality plans, but they need to be better implemented
- No opinion

# 19. Do you have any comments regarding the improvements of monitoring, modelling and the content of air quality plans (e.g. existing effectiveness, options to improve these elements, and the feasibility or impacts of such options)?

800 character(s) maximum

The European Cancer Organisation congratulates the European Commission for the initiatives it is taking to improve air quality in Europe.

The European Cancer Organisation fully supports the attention to air quality provided with Europe's Beating Cancer Plan, including the commitment to align the EU's air quality standards more closely with the WHO recommendations, and to encourage improvement of monitoring, modelling and air quality plans.

The European Cancer Organisation has also provided its endorsement to a 2021 Joint Statement by Medical, Public Health, Scientific Societies and Patient Representative Organisations that urges all nations to use the WHO air quality guidelines as the foundational basis for ambitious air quality and emission reduction policies around the world.

#### Part 3: Specialised questions section

20. Please indicate if you would like to answer this more specialised questions section on your views on air quality measures and their impacts. This section focuses on more technical aspects of the topics/measures considered by the Directives' revision

- Yes, I would like to reply to this section with more specialised questions (to Part 3)
- No, I would like to skip ahead to the final section of this questionnaire (to Part 4)

#### Part 4: Concluding questions & remarks

#### 28. What is your level of knowledge of the following?

	Excellent knowledge / understanding	Good knowledge / understanding	Some knowledge / understanding	Little knowledge / understanding	None
Issue of air pollution in general	0	0	۲	0	0
Different pollutants and their sources	0	0	۲	0	0
Areas most affected by air pollution	0	0	۲	0	0
Detrimental impacts of exposure to air pollution	0	0	۲	0	0
International initiatives to tackle air pollution (including World Health Organization guidelines)	0	O	۲	O	0
European legislation to tackle air pollution	0	0	۲	0	0
Implementation of European legislation to tackle air pollution	0	0	۲	©	0

# 29. If you wish to expand on any of your answers or if you wish to add comments or information on anything else, which is relevant to the Impact Assessment, please do so in the box below.

800 character(s) maximum

The European Cancer Organisation congratulates the European Commission for the initiatives it is taking to improve air quality in Europe.

The European Cancer Organisation fully supports the attention to air quality provided with Europe's Beating Cancer Plan, including the commitment to align the EU's air quality standards more closely with the WHO recommendations, and to encourage improvement of monitoring, modelling and air quality plans.

The European Cancer Organisation has also provided its endorsement to a 2021 Joint Statement by Medical, Public Health, Scientific Societies and Patient Representative Organisations that urges all nations to use the WHO air quality guidelines as the foundational basis for ambitious air quality and emission reduction policies around the world.

#### 30. If you consider there are materials / publications available online that should be considered further in relation to this Impact Assessment exercise, please feel free to describe them (title and author) in the box below and include any relevant links

800 character(s) maximum

# **31.** Do you have additional information that you would like to share in a concise document such as a position paper? (This is optional and will serve as additional background to better understand your position.)

The maximum file size is 1MB Only files of the type pdf,txt,doc,docx,odt,rtf are allowed
